Capabilities Brief

About Prysm

Prysm Technology is a minority-owned professional IT solutions and services company based in Fairfax, VA. Prysm focuses on delivering best-in-class program management consulting, system engineering and integration, and software development solutions. We at Prysm Technology are dedicated to helping our clients meet their needs, while at the same time, reducing their operating costs and adding to their bottom line. We separate ourselves from the pack by focusing on giving you the personal attention you deserve, and employing talented and dedicated people.

- All employees have TS/SCI with Full-scope polygraph security clearances
- All employees have 5+ years of experience working at a federal government agency within the Intelligence Community across all directorates

Software Engineering Solutions

Software Engineering Areas of Support

- Agile Development
- SOA
- Java/JEE
- .NET/ASP.NET (C#)
- SharePoint
- Adobe Flex
- X.509
- Oracle

The Software Engineering and Development Solutions division offers a broad range of software solutions. Our engineers bring a solid track record in the areas of JEE/.NET development, database engineering, and SharePoint 2008 development, deployment, administration, and integration. With expertise in all aspects of the software development lifecycle on all tiers of a software project, our engineers are equipped with the skills necessary to design, develop, and maintain any system.

Since our focus lies squarely on the federal government sector, we recognize the enormous need to secure our customers' most critical information. We are current with the latest PKI and other security solutions.

When designing systems, we take pride in our ability to expand our focus beyond the project level and design enterprise-aware solutions, mindful of the fact that in the new world of integration, a system must have the capability to easily interface with any other system. Through a Service-Oriented Architecture (SOA) approach, we achieve that goal.

PM Areas of Support

- PMP and ITIL certified
- PMF customization and training
- Scheduling
- Strategic Planning
- Portfolio Management
- Risk Management
- Financial Management
- Process Definition & Improvement
- Scrum

Program/Project Management

Leading people and projects is both a technical and people management task and can be extremely difficult to accomplish without the right tools and expertise. Prysm offers services that meet the traditional Project management paradigm but also offers new and innovative methods to scheduling, planning, and tracking projects.

The Project Management Consulting team will be responsible for providing customers leadership using industry best practices. Our project managers have extensive training in the Federal Government environment. They understand the processes and required governance needed to help government staff manage their project while still providing rapid mission support. Prysm offers Project Management customization and staff training to achieve this goal.

Let our Project Management Professionals & ITIL Certified staff get your projects on track.

Systems Integration Areas of Support

- Requirements Engineering
- System Analysis
- Systems Integration
- Systems Design
- Quality Assurance
- Testing
- Financial Management

Systems Engineering and Integration

Our talented system engineers offers expertise in Systems Engineering and Integration that will ensure a successful solution to your complex system needs. Prysm Technology's services include determination of system requirements, prototyping, design, development and integration of new systems, and following, support of fully operational systems. Our engineers help our clients in all phases of a system's lifecycle.

Perhaps the most important challenge faced by an enterprise today is integration with other systems. A system no longer stands alone, especially in the federal government space. Our engineers and integrators recognize this challenge and have extensive experience bringing disparate systems together. As COTS (Commercial Off The Shelf) products play an increasing role in enterprise solutions, this integration expertise proves even more crucial to project success.
